PROFESSIONAL SUMMARY:

Final-year B.E. Information Technology student (CGPA: 7.48/10) with hands-on experience building full-stack and AI-powered web applications — including Virtual-UI, a reusable UI component library/framework structured across client, library, and server modules; GenWeb.AI, an AI-driven website and landing page builder; and AI-Customer-Bot, a customer support chatbot for automated query handling. Strong focus on component-driven frontend architecture, applied AI integration, and building practical, deployable tools.

TECHNICAL SKILLS:

Languages: C, C++, JavaScript, Python

Backend Development: Node.js, Express.js

Frontend Development: React.js, Tailwind CSS, CSS3, HTML5

Database and Analytics: MySQL, PostgreSQL, MongoDB, Pandas, NumPy

Tools: Git & GitHub, Postman

Core Coursework: Data Structures & Algorithms, OOPs, DBMS, Computer Networks, OS

EXPERIENCE

ML Intern — Infosys Springboard | SwipeX

Jun 2026 – Aug, 2026

- Building SwipeX, a swipe-based intelligent job discovery platform that lets candidates browse and apply to jobs through an intuitive swipe interface, backed by a FastAPI REST backend and React.js frontend.
- Developing an AI-powered resume analyzer and ATS scoring engine (OpenAI API, spaCy, sentence-transformers) that performs keyword matching, flags missing skills, and generates resume-job compatibility scores with actionable improvement suggestions.

IIT Guwahati – Summer Analytics 2025 (6 Weeks)

- Built end-to-end machine learning pipelines involving data preprocessing, EDA, feature engineering, model training, and evaluation.
- Implemented and compared multiple regression and classification algorithms, applying cross-validation and hyperparameter tuning to improve performance.

FLAGSHIP PROJECT

SwipeX – Swipe-based Intelligent Job Discovery Platform

- Building a swipe-based job discovery platform with a FastAPI REST backend and React.js frontend, enabling candidates to browse, save, and apply to jobs through an intuitive swipe interface.
- Developing an AI-powered resume analyzer and ATS scoring engine that performs keyword matching skill-gap detection, and resume job compatibility scoring.
- Implementing a personalized recommendation engine that learns from swipe behavior, plus real time job freshness and competition-tracking features.

Virtual-UI – Reusable UI Component Library

[\[Live Link\]](#)

- Built a modular UI component library structured across client, library, and server layers, designed for reuse across multiple frontend projects.
- Architected reusable, composable components to reduce duplicate UI code and speed up frontend development workflows.

GenWeb.AI – AI-Powered Website Builder

[\[Live Link\]](#)

- Built an AI-driven website and landing page builder with a client-server architecture, enabling users to generate web pages from prompts or templates.
- Integrated AI generation logic into the page-building workflow to automate layout and content creation.

EDUCATION

- B.E. Information Technology – M.B.M University (2024–2027)
- Diploma in Computer Science – Govt. Polytechnic College (2021–2024)

CGPA: 7.48/10

CGPA: 9.64/10

ACHIVEMENTS

Abhivyakti Hackathon - Top 7

Developed a Sentiment Analysis system to detect depression and emotional distress among students in coaching-heavy cities, using NLP-based emotion classification.

Volunteer Eklavyotsav-2024

Volunteer, State-Level Inter-Polytechnic Sports Meet “Eklavyotsav-2024”, Govt. Polytechnic College, Kota.
